Announcement of the ICL '93 prize recipient xxvii

Section 1. Bulk semiconductors

Two-photon spectroscopy of 1S-excitons in an AC electric field
G. Biese, D. Fröhlich, W. Nieswand, E. Mohler 1

Fluorescent decay times of excitons bound to oxygen traps in ZnTe:O
Y. Burki, W. Czaja, V. Capozzi, P. Schwendimann 4

Photoluminescence spectra of trivalent praseodymium implanted in semi-insulating GaAs
L.E. Erickson, U. Akano, I. Mitchell, N. Rowell, A. Wang 8

Optical gain in ZnTe/GaAs epitaxial layers grown by MOVPE
F.A. Majumder, H. Kalt, C. Klingshirn, A. Naumov, H. Stanzl, W. Gebhardt 12

Spectroscopic detection of the $V^{+}(d^{4})$ acceptor state in zinc selenide and zinc sulfide
G. Goetz, U.W. Pohl, H.-J. Schulz, M. Thiede 16

Excited-state absorption of ZnSe doped with cobalt
A. Ehlert, J. Dreyhsig, H.-E. Gumlich, J.W. Allen 21

Exciton–phonon interaction and energy transfer of nitrogen-bound excitons in GaP
T. Bouma, A.J. Scholten, H.A. Zondag, Tj. Luijendijk, J.I. Dijkhuis 26

Donor–acceptor pair decay and evaluation of the recombination constant and the Bohr radii of shallow impurities in ZnSe
G.-J. Yi, G.F. Neumark 29

Optically stimulated fluorescent emission in $Ca_{1-x}Sr_xS$:Ce
D. Maneval, B. Ray, I.V.F. Viney, J.W. Brightwell, B.W. Arterton 32

Specular optical activity and specular gyrotropic linear dichroism in semiconductors
A.R. Bungay, Y. Pointel, N.I. Zheludev 36

Microwave modulated and thermal modulated photoluminescence studies of PbI_2 layered semiconductor
E. Lifshitz, L. Bykov, B.M. Ashkinadze 40

Fine structure of zero-phonon lines in polymorphic ZnS:Fe^{2+}
B. Litzenburger, U.W. Pohl, H.-E. Gumlich 44

Direct evidence of high efficiency of the Auger nonradiative recombination of acceptor bound excitons in $Cd_{1-x}Mn_xTe$
M. Godlewski, K. Świątek, B. Monemar 48

Application of the ODCR experiment to the identification of radiative recombination processes
M. Godlewski, W.M. Chen, B. Monemar 52

Voigt-photorefractive two-wave mixing in $Cd_{0.9}Mn_{0.1}Te$
R.S. Rana, E. Oh, K. Chua, A.K. Ramdas, D.D. Nolte 56

Section 2. Rare-earth and transition metal ions in insulators and semiconductors

The investigation of nonequilibrium phonon dynamics using defect induced one phonon absorption
W.M. Dennis 60

Converting Eu^{2+} to Eu^{3+} in europium-doped LMA
E. Luria, S.R. Rotman 67

The first observation of $^6I \rightarrow {}^8S$ emission from Eu^{2+} in $KMgF_3$
A. Ellens, A. Meijerink, G. Blasse 70

Vibronic transitions in the luminescence spectra of Pr^{3+} in $Na_5La(MoO_4)_4$
C. de Mello Donegá, M.J.D. Crombag, A. Meijerink, G. Blasse 74

Fluorescence and 1.06–0.53 μm second harmonic generation in Nd^{3+}doped $LaBGeO_5$
J. Capmany, L.E. Bausá, J. García-Solé, R. Moncorgé, A.V. Butashin, B.V. Mill, A.A. Kaminskii 78

Site-selective up-conversion in $LiNbO_3$:Er^{3+}
L. Núñez, B. Herreros, R. Duchowicz, G. Lifante, J.O. Tocho, F. Cusso 81

Luminescence side bands due to distributed Stark levels in Pr^{3+}:ZrO_2–Y_2O_3 (YSZ)
T. Okuno, K. Tanaka, K. Koyama, T. Suemoto 85

Fluorescence line narrowing in erbium-doped silica fibers
A.M. Jurdyc, B. Jacquier, J.C. Gâcon, J.F. Bayon, E. Delevaque 89

Red-to-blue up-conversion spectroscopy of Tm^{3+} in SrF_2, CaF_2, BaF_2 and CdF_2
J.P. Jouart, M. Bouffard, G. Klein, G. Mary 93

Characterization of spectroscopic properties of Nd^{3+}:$CaZn_2Y_2Ge_3O_{12}$ (CAZGAR)
D.K. Sardar, S. Vizcarra, M.A. Islam, T.H. Allik, E.J. Sharp, A.A. Pinto 97

Multiphonon side band excitation in rare-earth doped fibers and background loss limits
F. Auzel, Y.H. Chen 101

Luminescence detection of cation exchange in Na_3[Eu(2,6-pyridinedicarboxylato)$_3$]
N.A. Stump, G.K. Schweitzer, G.M. Murray, J.R. Peterson 104

Model calculation of the spectroscopic properties for Cr^{3+} in kyanite
Y.Y. Yeung, C. Rudowicz, Y.M. Chang, J. Qin 108

Luminescent properties of Eu^{3+} β-diketonate complexes supported on Langmuir–Blodgett films
O.A. Serra, I.L.V. Rosa, C.L. Medeiros, M.E.D. Zaniquelli 112

Upconversion mechanism of Pr^{3+}-doped fluoride fiber glass
K. Hirao, M. Higuchi, N. Soga 115

Near infrared emission at 1.35 μm in Cr doped glass
U. Hömmerich, H. Eilers, W.M. Yen, J.S. Hayden, M.K. Aston 119

Luminescence of Ni^{2+} centers in forsterite (Mg_2SiO_4)
G. Walker, B. Kamaluddin, T.J. Glynn, R. Sherlock 123

Cathodoluminescence of Ce:$La_2Be_2O_5$ single crystals
D.M. Gualtieri 127

Laser site-selective spectroscopy of Tb^{3+} ions in CaF_2 and SrF_2
G.D. Jones, K.M. Murdoch 131

Zeeman measurements of transient holes at MHz frequencies
N.B. Manson, T. Boonyarith, J.P.D. Martin, M. Sellars 135

Spectroscopy of CrO_4^{4-}, MnO_4^{3-} and FeO_4^{2-}: new $(3d)^2$ luminophores in the NIR
T. Brunold, M. Herren, U. Oetliker, H.U. Güdel, U. Kesper, C. Albrecht, D. Reinen 138

NIR to VIS/UV up-conversion in $Cs_3Er_2X_9$ (X = Cl,Br,I)
M.P. Hehlen, K. Krämer, H.U. Güdel 142

1.47, 1.88 and 2.8 μm emissions of Tm^{3+} and Tm^{3+}–Ho^{3+}-codoped tellurite glasses
J.S. Wang, E. Snitzer, E.M. Vogel, G.H. Sigel, Jr 145

Effect of Gd^{3+} substitution for Y^{3+} in $YLiF_4$, $KLiYF_5$, and YVO_4
F.G. Anderson, H. Weidner, P.L. Summers, R.E. Peale, X.X. Zhang, B.H.T. Chai 150

Luminescent properties of Cr^{3+}-doped $LaSr_2Ga_{11}O_{20}$
C.J. McDonagh, T.J. Glynn, G.F. Imbusch, G.P. Morgan, A.A. Kaminskii 154

Origin of the NIR emission in Cr-doped forsterite, $Y_3Al_5O_{12}$ and Y_2SiO_5
W. Jia, H. Liu, Y. Wang, U. Hömmerich, H. Eilers, K.R. Hoffman, W.M. Yen 158

Embedded cluster calculations on $BaTiO_3$:Mn_{Ti}^{4+}
H. Donnerberg, R.H. Bartram 162

Optical detection of FIR generated monochromatic phonons in Cr^{3+} doped borate glass
S.P. Feofilov, G.P. Flinn, W.M. Dennis, A.A. Kaplyanskii 165

Photoconductivity of extrinsic ion-doped PLZT ceramics
C.T. Lin, L. Li, J.D. McNeill, R.A. Lipeles, M.B. Tueling, M.S. Leung 170

Efficient blue upconversion in Tm^{3+} and Pr^{3+} doped BIGaZYbTZr glasses
B. Jacquier, C. Linarès, R. Mahiou, J.L. Adam, E. Dénoue, J. Lucas 175

Infrared to blue up-conversion in Pr^{3+} doped YAG and $LiYF_4$ crystals
M. Malinowski, M.F. Joubert, B. Jacquier 179

Photoconductivity of titanium doped insulating oxide crystals
W.C. Wong, D.S. McClure, S.A. Basun 183

High pressure optical studies of doped YAG
P.R. Wamsley, K.L. Bray 188

High resolution spectroscopy of Cr^{4+} doped $Y_3Al_5O_{12}$
S. Kück, U. Pohlmann, K. Petermann, G. Huber, T. Schönherr 192

Infrared excited state absorption of Ni^{2+} doped crystals
J. Koetke, K. Petermann, G. Huber 197

Host-impurity radiative energy transfer in $CdO–SiO_2:Nd^{3+}$ glasses
A. Clark, R. Pérez, E. Rivera, J.Ma. Rincón 201

Spectroscopic evaluation of the vibrational coupling of Er^{3+} ions in phospho-aluminosilicate fibres and an explanation of compositional variations in Er–Yb 1.5 μm amplifier performance
J.R. Lincoln, W.L. Barnes, W.S. Brocklesby, J.E. Townsend 204

Hole burning studies of Pr^{3+}-doped fluoride and chalcogenide glasses
A. Pearson, W.S. Brocklesby 208

Infrared-to-visible conversion luminescence of Tm^{3+} and Yb^{3+} ions in glass ceramics
X. Wu, J.P. Denis, G. Özen, F. Pellé 212

Luminescence of Pr^{3+} ions in sodium β-Al_2O_3 crystals
G. Mariotto, F. Tietz, E. Zanghellini, M. Ferrari 216

Photoluminescence of highly Er-doped silica films and Er-doped gallium arsenide
H.K. Kim, C.C. Li, X.M. Fang, Y. Li, D.W. Langer, J. Solomon 220

High pressure spectroscopy of LLGG doped with Cr^{3+}
D. Galanciak, P. Perlin, M. Grinberg, A. Suchocki 223

Defect chemistry of rare earth doped strontium titanate
L.J. Knott, J.C. Wright 227

Thermal red and blue shifts of Nd ion spectral lines in laser garnet crystals
X. Chen, J. Collins, B. Di Bartolo 230

Up-conversion in Pr^{3+}-doped tellurite glasses
S.I. Kim, S.I. Yun 233

Spectrally selective energy transfer from Fe^{3+} to Tm^{3+} in garnet lattices
V. Lupei, G. Boulon, A. Lupei, M.J. Elejalde, A. Brenier, C. Pedrini 237

Spectroscopic determination of the figures of merit for 3 μm Er^{3+} lasers
S. Georgescu, V. Lupei, T.J. Glynn, R. Sherlock 241

Optical spectra of U^{3+} and U^{4+} in $LiYF_4$ crystals
S. Hubert, E. Simoni, M. Louis, W.P. Zhang, J.Y. Gesland 245

Section 3. Microstructures and restricted geometries

Probing terahertz dynamics in semiconductor nanostructures with the UCSB free-electron lasers
S.J. Allen, K. Craig, C.L. Felix, P. Guimarães, J.N. Heyman, J.P. Kaminski, B.J. Keay, A.G. Markelz, G. Ramian, J.S. Scott, M.S. Sherwin, K.L. Campman, P.F. Hopkins, A.C. Gossard, D. Chow, M. Lui, T.Y. Liu 250

Luminescence and lasing of CuCl nanocrystals
Y. Masumoto 256

The electron–hole plasma and liquid in confined semiconductor systems
H. Kalt 262

Optical properties of PbI-based perovskite structures
T. Ishihara 269

Doped nanocrystals of semiconductors – a new class of luminescent materials
R.N. Bhargava, D. Gallagher, T. Welker 275

Reradiation and imaging of diffuse photon density waves using fluorescent inhomogeneities
M.A. O'Leary, D.A. Boas, B. Chance, A.G. Yodh 281

Modulation spectroscopy characterization of semiconductor microstructures and semiconductor devices
H. Shen 287

Theory of geminate recombination in magnetic field in MQW structures
I.A. Merkulov, V.I. Perel 293

The origin of efficient luminescence in highly porous silicon
K.J. Nash, P.D.J. Calcott, L.T. Canham, M.J. Kane, D. Brumhead 297

Narrow-band spectral hole burning in quantum dots
S.V. Gaponenko, U. Woggon, A. Uhrig, W. Langbein, C. Klingshirn 302

Diluted magnetic semiconductors as a tool for wave-function mapping in semiconductor heterostructures
M. Dobrowolska, H. Luo 308

Nonradiative damping of quantized exciton in ultrathin CuCl epitaxial films
Z.K. Tang, A. Yanase, T. Yasui, Y. Segawa 316

Exciton lineshape in semiconductor quantum structures with interface roughness
R. Zimmermann, E. Runge 320

c-Si like phonon structures in the luminescence of porous Si
T. Suemoto, K. Tanaka, A. Nakajima, T. Itakura 324

Radiative properties of excitons in multiple quantum wells
D.S. Citrin 327

Nonlocal response of size-quantized excitons in a semiconductor microsphere
K. Cho, M. Nishida, Y. Ohfuti, L. Belleguie 330

Self-consistent determination of Wannier–Stark localization and Raman scattering in a modulation-doped semiconductor superlattice
R.H. Yu 333

Exciton confinement on a spherical shell: visible photoluminescence from oxidized Si and Ge nanoballs
Y. Kanemitsu, T. Ogawa, K. Shiraishi, K. Takeda 337

Geminate recombination in multiple quantum wells
V.I. Belitsky, T. Ruf, J. Spitzer, M. Cardona 340

Magneto-optical study of Mn containing broad gap II-VI quantum well structures and superlattices
W. Heimbrodt, O. Goede, V. Weinhold, K. Hieke, M. Happ, N. Hoffmann, J. Griesche, K. Jacobs 344

Raman spectroscopy of GaAs–AlAs superlattices: a study of interface roughness
R.J. York, S.R.P. Smith, T. Dumelow, C.T. Foxon, D. Hilton, J.W. Orton 349

Optical gain of CdSSe-doped glass
F. Zhou, W. Qin, C. Jin, J. Zhao, K. Dou, S. Huang, J. Yu 353

Luminescence properties of Nd^{3+}, Sm^{3+} and Eu^{3+} intercalated $CdPS_3$
R. Clément, A. Léaustic, K. Marney, A.H. Francis 355

Luminescence quenching of nonstoichiometric CdS clusters by metalloporphyrins (MTPP)
Bhamro, J. Chrysochoos 359

Polar enhancement of the nonlinear optical properties of Fe_2O_3 microcrystallites
X. Ai, H. Fei, Y. Yang, L. Han, R. Nie, Y. Zhang, C. Zhao, L. Xiao, T. Li, J. Zhao, J. Yu. 364

Dynamics of localized exciton recombination and migration in GaAs multiple quantum wells
X.G. Huang, Z.G. Cai, Z.X. Yu 368

Luminescence of a quantum-confined dense electron–hole plasma from PbSe nanostructures
K.H. Herrmann, J.W. Tomm, S. Haertel, W. Hoerstel, K.-P. Möllmann, W. Heimbrodt, M. Tacke, H. Böttner 371

Mesoscopic enhancement of optical nonlinearity in semiconducting quantum dots: CuCl and CuBr microcrystals
A. Nakamura, Y.L. Lee, T. Kataoka, T. Tokizaki 376

Nonlinear optical response of C_{60} molecules
K. Harigaya, S. Abe 380

Anomalous time dependence of photoluminescence from porous Si
P.D. Stevens, R. Glosser 383

High pressure investigation of the photoluminescence of porous silicon
J.M. Ryan, P.R. Wamsley, K.L. Bray 387

Landau versus one-dimensional quantization in GaAs
M. Oestreich, A.P. Heberle, W.W. Rühle, H. Lage, D. Heitmann, K. Ploog 390

Microwave modulation of the photoluminescence due to separately localized e–h pairs in quantum wells
B.M. Ashkinadze, E. Lifshitz, L.N. Pfeiffer 393

Interface effects on the properties of confined excitons in CuCl microcrystals
T. Itoh, S. Yano, N. Katagiri, Y. Iwabuchi, C. Gourdon, A.I. Ekimov 396

Transient photoluminescence of GaAs/AlGaAs quantum wires
Y. Zhang, M.D. Sturge, K. Kash, B.P. Van der Gaag, A.S. Gozdz, L.T. Florez, J.P. Harbison .. 400

Visible light emitting from the surface layer on a porous layer
Y.-d. Zhou, Y.-x. Jin, Y.-q. Ning 404

Section 4. Disordered and amorphous materials

Effect of exciton localization and delocalization on magnetic-field-dependent photoluminescence line widths in semiconductors
S.K. Lyo, E.D. Jones, S.R. Kurtz 409

Influence of disorder on electronic states and optical line shapes in chain molecules
Th. Neidlinger, P. Reineker 413

Observation of dilution line narrowing in Eu^{3+}:SiO_2
S.M. Jaffe, M.L. Jones, W.M. Yen 417

Spatial fluorescence profiles in multiple light scattering systems
D. Oelkrug, M. Brun, U. Mammel 422

Phase-conjugated wave and localized–delocalized transition of an exciton
N. Taniguchi, E. Hanamura 426

Optical probes of phonon localization in glass
G. Dixon, P.A. Watson, J.P. Wicksted, D. Bromwell 430

Defect-related luminescent patterns in bulk silica and optical fibers stimulated by sub-band gap (248 nm) excimer laser irradiation
S. Kannan, M.E. Fineman, G.H. Sigel Jr 433

Dynamics of spectral holes in rare-earth-doped glass fibers
R. Wannemacher, J.M.A. Koedijk, S. Völker 437

Luminescence and nonlinear optical properties of porous silicon
P. Malý, F. Trojánek, J. Valenta, V. Kohlová, S. Banáš, M. Vácha, F. Adamec, J. Dian, J. Hála, I. Pelant 441

A model for the spectral diffusion of single molecule optical transitions in solids
P.D. Reilly, J.L. Skinner 445

Anderson localization with short-range correlated diagonal disorder
M.D. Stephens, J.L. Skinner 449

Section 5. Organic materials

Luminescence of rhodamine dyes doped in amorphous silica glasses
Y. Takahashi, T. Kitamura, M. Nogami, K. Uchida, T. Yamanaka 451

Organic molecular crystals: formation of excimers
H. Däubler, V.I. Yudson, P. Reineker 454

Spectroscopic determination of molecular fields for octatetraene in n-alkane crystals
B.E. Kohler 458

Optical properties of quasi-one-dimensional silicon polymers with different backbone structures
Y. Kanemitsu, K. Suzuki, Y. Masumoto, H. Matsumoto 462

Luminescence and relaxation of the excited states in covalent-linked tetratolylporphyrin–phthalocyanine
K. Dou, J. Zhang, W. Xu, S. Huang, J. Yu, X. Xu 465

Study of nonlinear absorption in metalloporphyrin-doped sol–gel materials
X.-j. Wang, L.M. Yates III, E.T. Knobbe 469

The triplet states in lactone form of rhodamine 101
J. Karpiuk 474

Time resolved luminescence spectroscopy of conjugated polymers
R.F. Mahrt, U. Lemmer, A. Greiner, Y. Wada, H. Bässler, E.O. Göbel, R. Kersting, K. Leo, H. Kurz 479

Photoconductivity of the ladder polymer BBL
K.S. Narayan, B.E. Taylor, R.J. Spry, J.B. Ferguson 482

Sensitized absorption and emission of monomer and dimer forms of acridine orange adsorbed onto microcrystalline cellulose
L.F. Vieira Ferreira, A.S. Oliveira, I.V. Khmelinskii, S.M.B. Costa 485

Fluorescence hole-burning spectroscopy of phthalocyanine Langmuir–Blodgett films
F. Adamec, M. Ambrož, J. Dian, M. Vácha, E. Brynda, J. Hála 489

Rare earth excited state quenching as a probe to exciplex formation in polyethylene phthalate doped with the $Eu(pya)_3 \cdot 2H_2O$ complex
W.M. de Azevêdo, P.N.M. dos Anjos, O.L. Malta, G.F. de Sá 493

Section 6. Biological materials and systems

Ultrafast spectroscopy of the primary electron and energy transfer processes in the reaction center of photosystem II
A.R. Holzwarth, M.G. Müller, G. Gatzen, M. Hucke, K. Griebenow 497

Femtosecond dynamics of heme proteins
L. Zhu, P. Li, J.T. Sage, P.M. Champion 503

Excited state dynamics of metalloporphyrins in the gas phase
J. Rodriguez, W. Westerfield, B. Whiteley, C. Kirmaier, D. Holten 507

Sensitive fluorescence detection using laser diodes and multiplex dyes
G. Bachteler, K.-H. Drexhage, J. Arden-Jacob, K.-T. Han, M. Köllner, R. Müller, M. Sauer, S. Seeger, J. Wolfrum 511

The B820 sub-unit of the bacterial light-harvesting antenna, a dis-ordered dimer?
M.H.C. Koolhaas, F. van Mourik, G. van der Zwan, R. van Grondelle 515

From chlorophyll a towards bacteriochlorophyll a: excited-state processes of modified pigments
K. Teuchner, H. Stiel, D. Leupold, I. Katheder, H. Scheer 520

Site directed study of excited energy transfer in photosynthetic antenna by hole burning in fluorescence spectra
M. Vácha, J. Pšenčík, F. Adamec, M. Ambrož , J. Dian, L. Nedbal, J. Hála 523

Section 7. Point centers and defects in crystals

Influence of Tl^+ concentration on emission and decay kinetics of $CsI:Tl^+$ single crystals
G.P. Pazzi, M. Nikl, M. Bacci, E. Mihokova, J. Hlinka, P. Fabeni, L. Salvini 527

Optical excitations associated with bound exciton states at the vacancy in diamond
J.E. Lowther 531

A new interpretation of the "F-center" luminescence in CaO crystals
G.J. Pogatshnik 535

Optically stimulated luminescence in synthetic quartz
N. Kristianpoller, M. Abu-Rayya, R. Chen 540

Resonant photoluminescence and excitation spectroscopy on donor and acceptor states in doped ZnTe epilayers
K. Wolf, A. Naumov, H.P. Wagner, F. Gilg, H. Sahin, H. Stanzl, W. Gebhardt 544

Photoluminescence of F_B centers in KF:Na^+
G. Baldacchini, M. Cremona, R.M. Montereali, C. Giliberti, A. Scacco, U.M. Grassano, A. Shpak 548

Photoluminescence of LiF:NaF films at room temperature
R.A. Nunes, A.P. da Silva Sotero, L.C. Scavarda do Carmo, M. Cremona, R.M. Montereali, M. Rossi, F. Somma 552

Pseudodonor character of silver in silicon
I. de Maat-Gersdorf, T. Gregorkiewicz, C.A.J. Ammerlaan 556

Uniaxial stress effects on the "ABC" isoelectronic centre in crystalline silicon
M.Z. Iqbal, G. Davies, E.C. Lightowlers 559

Radiationless electronic relaxation of the F-center in NaI
F. De Matteis, M. Leblans, D. Schoemaker 563

Particle stimulated luminescence as a probe of defects in silicas
P.W. Wang 566

VUV luminescence and spectroscopy of F_2 in Ne crystals
C. Bressler, W. Lawrence, M. Chergui, N. Schwentner 570

Thermoluminescence spectra of eulytine $Bi_4Si_3O_{12}$ and $Bi_4Ge_3O_{12}$ single crystals
L. Kovács, S.G. Raymond, B.J. Luff, Á. Péter, P.D. Townsend 574

Photoluminescence in Czochralski and hydrothermally grown bismuth silicon oxide
D.W. Hart, M. Hamilton, C.A. Hunt, J.J. Martin, M. Harris, J.J. Larkin 578

Optical properties of the $MnCl_6^{4-}$ complex formed in $ABCl_3$:Mn^{2+} pseudoperovskite crystals: influence of the chemical pressure
M.C. Marco de Lucas, F. Rodríguez, H.U. Güdel, N. Furer 581

Photostimulated luminescence: a tool for the determination of optical properties of defect centers
M. Thoms 585

Calorimetric absorption spectroscopy of copper centers in II–VI semiconductors at mK temperatures
I. Broser, L. Podlowski, P. Thurian, R. Heitz, A. Hoffmann 588

Effect of a local charge compensator on trapping cross-section and photoionization energy of impurities in a crystal
W. Mou, D.S. McClure 592

1.54 μm luminescence of Er-MeV implanted silicon
A. Majima, S. Uekusa, K. Abe, M. Kumagai 595

A theory of the Mollwo–Ivey law for defect absorption and its correlation to the Stokes shift in emission
M.S. Malghani, D.Y. Smith 599

Luminescence, absorption and magnetic circular dichroism of Pb^- centers in KCl crystals
V. Topa, B. Briat, J.C. Rivoal, C. Pedrini, B. Moine 603

Luminescent decay of the relaxed excitons localized at iodine dimers in NaCl:I and KCl:I
K. Edamatsu, T. Hiramatsu, M. Hirai 607

Thermoluminescence from solid krypton crystal
M. Kirm, H. Niedrais 611

Spin forbidden transitions in diamond
L. Santos, E. Pereira 614

Photostimulated luminescence of $BaBr_2$:Eu
N. Iwase, S. Tadaki, S. Hidaka, N. Koshino 618

Ubiquitous blue luminescence from undoped synthetic sapphires
B.D. Evans 620

Section 8. Nonlinear processes

Nonlinear spectroscopy of 1S-excitons in CuCl under uniaxial stress
D. Fröhlich, W. Nieswand, S. Rübenacke 627

Excitonic optical bistability of ZnSe–ZnS/GaAs MQWs on reflection at room temperature
D.Z. Shen, X.W. Fan, B.J. Yang, L.C. Chen, J.Q. Yu 630

Up-conversion in Pr^{3+}:$CsCdBr_3$
U. Schäfer, J. Neukum, N. Bodenschatz, J. Heber 633

Upconversion excitation of green fluorescence in Er:YAG
A. Silversmith 636

High intensity absorption saturation in photodarkened CdS_xSe_{1-x} doped glasses
A.S.L. Gomes, R.M. Balachandran, N.M. Lawandy 640

Dynamics of optical nonlinearities in CdZnTe at room temperature
R. Lévy, D. Ohlmann, M. Benhmida, B. Hönerlage, J.B. Grun 644

An ytterbium-doped monomode fiber laser: amplified spontaneous emission, modeling of the gain and tunability in an external cavity
S. Magne, M. Druetta, J.P. Goure, J.C. Thevenin, P. Ferdinand, G. Monnom 647

Blue up-conversion in Yb^{3+}–Er^{3+} codoped $CsCdBr_3$ under infrared excitation
P. Goldner, F. Pellé 651

A new 4WM process: vibrationally enhanced IR spectroscopy
A. Zilian, M.J. LaBuda, J.P. Hamilton, P.C. Chen, J.C. Wright 655

High density exciton behavior and bi-exciton states on the stacking fault excitons in BiI_3
H. Kondo, T. Karasawa, I. Akai, M. Ichida, T. Komatsu 658

Intra-$4f^2$ two-photon transitions in Pr^{3+}:$LiYF_4$
B.Q. Xie, Y.M. Cheung, S.K. Gayen 661

$^7F_J \rightarrow {}^5D_J$, two-photon absorption transitions in $Eu(OH)_3$
R. Mahiou, J.C. Gâcon, B. Jacquier, R.L. Cone 664

Observation of avalanche-like behavior in Tm^{3+}:Y_2O_3
J.M. Dyson, S.M. Jaffe, H. Eilers, M.L. Jones, W.M. Dennis, W.M. Yen 668

Evaluation of $|\chi^{(3)}|$ at the GTA of biexcitons in CuCl by high resolution polarization spectroscopy
M. Hasuo, M. Nishino, N. Nagasawa 672

Four-photon mixing stimulated fluorescence in silica-based optical fibers
B. Poumellec, H. Février 676

Two-photon vibronic transitions in centrosymmetric lanthanide systems
J. Sztucki 681

One and two photon absorption spectrum of Mn^{4+} in trigonal Cs_2TiF_6
C. Campochiaro, C.D. Flint, Z. Hasan, G. Hollingsworth, N.B. Manson, D.S. McClure 684

Energy relaxation of hot electrons in degenerate p-type III–V semiconductors
O.A. Mezrin, A. Feygenson, R.A. Hamm 688

Room temperature photon avalanche up-conversion in Er-doped ZBLAN glass
F. Auzel, Y. Chen, D. Meichenin 692

Infrared to violet up-conversion in $YLiF_4$:Nd^{3+}
A.d. Novo-Gradac, W.M. Dennis, A.J. Silversmith, S.M. Jacobsen, W.M. Yen 695

Section 9. Ultrafast phenomena

Ultrafast electronic dephasing dynamics of large molecules in room temperature liquids studied by variable pulse-width tunable femtosecond transient absorption spectroscopy
P. Cong, H.P. Deuel, Y.-J. Yan, J.D. Simon 699

Recombination luminescence in Durham polyacetylene and norbornylene–polyacetylene copolymer
J.R.G. Thorne, G.D. Reid, G.G. McFadyen, G.S. Beddard 703

Early stage of Coulomb screening and kinetics under femtosecond excitation within the non-equilibrium RPA
K. El Sayed, L. Bányai, H. Haug 706

Transient polarization four-photon "non-Condon" spectroscopy of electronic transitions in complex molecules
B. Fainberg, R. Richert, S.Y. Goldberg, D. Huppert 709

Picosecond spectroscopy of the resonant secondary radiation of F centers in KCl
N. Akiyama, H.Ohkura 713

Time-resolved electronic Raman measurements in germanium by 100 fs Ti:Al_2O_3 laser
K. Tanaka, H. Ohtake, T. Suemoto 716

Femtosecond spectroscopy of self-trapping processes of holes and excitons in alkali halides
S. Iwai, T. Tokizaki, A. Nakamura, T. Shibata, K. Tanimura, A. Shluger, N. Itoh 720

Femtosecond Fourier-transform spectroscopy of low-frequency intermolecular motions in weakly interacting liquids
E.W. Castner Jr., Y.J. Chang, J.S. Melinger, D. McMorrow 723

Picosecond resonance Raman studies of ultrafast vibrational dynamics of S_1 trans-stilbene in alcohols and alkanes
J. Qian, S.L. Schultz, G.R. Bradburn, J.M. Jean 727

Temperature dependence of carrier dynamics in $CdSe_xS_{1-x}$ doped glasses studied by two-color picosecond spectroscopy
G. Beadie, E. Sauvain, A.S.L. Gomes, N.M. Lawandy 731

Luminescence studies of ultrafast energy transfer oscillations in dimers
K. Wynne, S. Gnanakaran, C. Galli, F. Zhu, R.M. Hochstrasser 735

Section 10. Coherent processes

Zeeman coherence and quantum beats in ultrafast photon echoes of N-V centers in diamond
S.C. Rand, A. Lenef, S.W. Brown 739

Accumulated photon echo in CaF_2–YF_3:Nd^{3+} crystals
K.W. Ver Steeg, A.Ya. Karasik, R.J. Reeves, T.T. Basiev 742

Spatial and temporal study of the 29 cm^{-1} phonon bottleneck in ruby using a PICOLO detector
D.M. Boye, J. Wesner 745

Nonlinear optical response of excitons in small ring clusters
F.C. Spano, F.B. Gallagher 749

Coherent optical transients in rare earth doped fibers: enhancement of accumulated grating echo signals by the maximum entropy method
A.J. Lucero, D.S. Hamilton 753

Section 11. Excitons and collective phenomena

Bose–Einstein condensation of biexciton system in CuCl
M. Hasuo, N. Nagasawa, T. Itoh, A. Mysyrowicz 758

Self-consistent polaron states in the presence of simultaneous local and nonlocal exciton–phonon coupling
Y. Zhao, D.W. Brown, K. Lindenberg 762

Excitonic energy transfer in Au doped and undoped Kr solids
B. Herkert, A. Schrimpf, K. Göttsche, T. Bornemann, R. Brüning, H.-J. Stöckmann 768

Polarons, excitonic polarons and self-trapping
J. Singh 772

Non-radiative exciton annihilation dynamics in pyrene and α-perylene crystals
A.H. Matsui, T. Nakamura, S. Nakatani, T. Ohno, K. Mizuno 775

Wave propagation of exciton-polaritons by a wave vector space method
B. Chen, D.F. Nelson 778

Spectroscopy of the fractional quantum Hall effect: manifestation of fractional charges
E.I. Rashba, V.M. Apalkov, M.E. Portnoi 782

Exciton–optical-phonon couplings in semiconductor quantum dots
Y. Chen, S. Huang, J. Yu, Y. Chen 786

Time-resolved and CW optical studies of MBE-grown ZnTe/GaSb epilayers
M.J. McNamee, R.A. Taylor, P.A. Snow, W. Hayes, D.E. Ashenford, B. Lunn 788

Laser spectroscopy of highly excited 1-D Frenkel excitons
T. Tokihiro, H. Suzuura 792

Absorption bands in the absorption edge region of p-terphenyl crystals
K. Uchida, T. Segawa, Y. Takahashi 795

Effect of hydrostatic pressure on the self-trapped exciton luminescence in CsI
T. Tsujimoto, H. Nishimura, M. Nakayama, H. Kurisu, T. Komatsu 798

Tunneling processes between semiconductors highly excited by coherent optical fields
T. Iida, T. Kawazu, M. Aihara 802

Excitonic *n*-string in one-dimensional Frenkel exciton systems
H. Ezaki, T. Tokihiro, E. Hanamura 805

Optical Josephson effect in weakly coupled semiconductors
M. Aihara, T. Iida, T. Higashimura 809

New model of excitonic bands and molecular arrangement of highly oriented J-aggregates in polymer films prepared by a novel method
K. Misawa, H. Ono, K. Minoshima, T. Kobayashi 812

Pressure effects on excitons, phonons and exciton–phonon interactions in BiI_3 and SbI_3 single crystals
H. Kurisu, T. Komatsu, T. Tanaka, I. Akai, T. Karasawa, T. Iida 816

Two-dimensional electron gas effects in the electromodulation spectra from a pseudomorphic GaAlAs/InGaAs/GaAs modulation-doped quantum well structure
H. Qiang, Y. Yin, D. Yan, F.H. Pollak, G. Gumbs, D. Huang, T.F. Noble 819

Excitation wavelength-dependent superradiant decay in PIC J aggregates
S. Kobayashi, F. Sasaki 824

Luminescence study of C_{60}
P. Bowmar, M. Kurmoo, M.A. Green, W. Hayes, P. Day, K. Kikuchi 827

Temperature-dependent radiative recombination of free excitons in high-quality GaAs heterostructures
H.P. Hjalmarson, G.D. Gilliland, D.J. Wolford, T.F. Kuech, J.A. Bradley 830

Section 12. Energy transfer and excited state dynamics

A QED theory of intermolecular energy transfer in dielectric media
D.L. Andrews, G. Juzeliūnas 834

Phonon-assisted energy transfer
M. Chua, P.A. Tanner, M.F. Reid 838

Stimulated emission and excited-state absorption at room temperature on the 550 nm-laser transition in Er^{3+} doped $YAlO_3$
M. Pollnau, E. Heumann, G. Huber 842

Energy transfer between UV generated color centers and the CN^- ion in alkali halides
J.T. McWhirter, U. Happek, A.J. Sievers 846

Radiative processes in poly(phenylene vinylene)
F.X. Bronold, A. Saxena, A.R. Bishop 849

Dynamics in the lowest excited triplet state of Rh^{3+}-chelates
C.P.M. Giesbergen, M. Glasbeek 853

Phonon assisted stimulated energy transfer in PrF_3
S.M. Kirkpatrick, W.M. Dennis, W.M. Yen 857

Up-conversion and cross-relaxation in Tb^{3+}:$LiYF_4$
G.K. Liu 860

Role of the dipole–quadrupole interaction in fluorescence of RE glasses estimated by Monte Carlo simulation
K. Tonooka, K. Yamada, N. Kamata, F. Maruyama 864

Excited state tautomerization in porphycenes studied by polarized spectroscopy
J. Waluk, E. Vogel 867

Up- and down-conversion processes in Yb^{3+}–Tm^{3+}–Ho^{3+} doped $Gd_3Ga_5O_{12}$ garnet
A. Brenier, L.C. Courrol, C. Pedrini, C. Madej, G. Boulon 870

Sensitized near-infrared luminescence from cobaltocene doped in single crystals of ruthenocene
M. Davis, C. Reber 874

Temperature and concentration dependences of Ho^{3+} to Yb^{3+} energy transfer in Yb^{3+}, Ho^{3+} codoped KYF_4
X.X. Zhang, P. Hong, M. Bass, R.E. Peale, H. Weidner, B.H.T. Chai 878

Monte Carlo numerical simulations of non-radiative energy transfer process
O. Barbosa-Garcia, C.W. Struck 882

Proton transfer along the internal hydrogen bonds in excited Schiff bases. Photochromism in symmetric systems with two equivalent reaction sites
A. Grabowska, K. Kownacki, Ł. Kaczmarek 886

Energy transfer between thulium and praseodymium ions in solids
N.J. Cockroft, K.M. Murdoch 891

Numerical investigations on the experimental accessibility of "instantaneous fluorescence quantum yield"
J. Ehlert, D. Leupold, S. Oberländer, K. Teuchner 895

Electronic properties of InGaAsP epitaxial layer surfaces
L. Jedral, H.E. Ruda, L. Mannik 899

Section 13. Electroluminescence

Progress in organic electroluminescent materials and device structures
S. Saito, E. Aminaka, T. Tsutsui, M. Era 902

Electroluminescence and photovoltaic effect in PPV Schottky diodes
W. Rieß, S. Karg, V. Dyakonov, M. Meier, M. Schwoerer 906

Organic electroluminescence and competing technologies
J.W. Allen 912

The electroluminescence of Pr ions in ZnS thin films
Y. Hou, Y. Hua, X. Xu 916

Photoluminescence and electroluminescence of new PPV-based light-emitting copolymers
B. Hu, F.E. Karasz, D.C. Morton, I. Sokolik, Z. Yang 919

Influence of Eu concentration on recombination processes in CaS:Eu^{2+} thin films
K. Świątek, K. Karpińska, M. Godlewski, L. Niinistö, M. Leskelä 923

Zn_2SiO_4 as a host material for phosphor-emitting layers of TFEL devices
T. Miyata, T. Minami, K. Saikai, S. Takata 926

Section 14. Scintillators

The luminescence efficiency of scintillators for several applications: State-of-the-art
G. Blasse 930

Cross-luminescence
C.W.E. van Eijk 936

Fundamental limitations of scintillators
A. Lempicki, A.J. Wojtowicz 942

The high energy physics demand for a new generation of scintillators
P. Lecoq 948

Mechanism of scintillations in cerium-doped gadolinium orthosilicate Gd_2SiO_5:Ce crystals
V.G. Baryshevsky, D.M. Kondratiev, M.V. Korzhik, V.B. Pavlenko, A.A. Fedorov 956

Fast and heavy $GdAlO_3$:Ce scintillators
S.A. Smirnova, L.I. Kazakova, A.A. Fyodorov, M.V. Korzhik 960

Energy transfer from Gd to Ce in $Gd_2(SiO_4)O$:Ce
H. Suzuki, T.A. Tombrello, C.L. Melcher, J.S. Schweitzer 963

Luminescent materials for medical application
B.C. Grabmaier 967

Energy transfer in CeF_3 and CeF_3:Cd single crystals
M. Nikl, J.A. Mares, E. Mihokova, K. Blazek, J. Lorincik 971

Optical properties of potassium rare earth orthophosphates of the type $K_3RE(PO_4)_2$
B. Finke, L. Schwarz, P. Gürtler, M. Kraas, M. Joppien, J. Becker 975

Scintillation and thermoluminescence properties of Lu_2SiO_5:Ce fast scintillation crystals
P. Dorenbos, C.W.E. van Eijk, A.J.J. Bos, C.L. Melcher 979

Energy levels of the CeF_{nnn} center in BaF_2 and implications for the cerium excitation kinetics
R. Visser, J. Andriessen, P. Dorenbos, C.W.E. van Eijk 983

The scintillation properties of $Ce_xLa_{1-x}F_3$
A.J. Wojtowicz, M. Balcerzyk, A. Lempicki 987

Section 15. Single-molecule spectrosopy in condensed media

Single molecule fluorescence: from excitation spectra to time correlation
M. Orrit, J. Bernard, R. Brown, L. Fleury, J. Wrachtrup, C. von Borczyskowski 991

Fundamentals of single-molecule spectroscopy in solids
W.E. Moerner 997

Single molecule spectroscopy: Stark-, pressure-, polarization-effects and fluorescence lifetime measurements
U.P. Wild, M. Croci, F. Güttler, M. Pirotta, A. Renn 1003

Author index 1009

Subject index 1025

Materials index 1029
